**Cardiology Consultants, PC is offering FREE ABI Screenings on Mondays 7a - 2p.
Please contact us at 205-752-0694 for an appointment date/time.**

Peripheral Artery Disease (PAD) is a serious circulatory problem in which the blood vessels that carry blood to your arms, legs, brain and kidneys, become narrowed or clogged. It may result in leg discomfort with walking, poor healing of leg sores/ulcers, blood pressure that is difficult to control, or symptoms of stroke. People with PAD are at significantly higher risk of strokes and heart attacks.
